SCREENING PRODUCTS

Vic Conveyors & Crushing

Table of Contents

VCC offers a full range of high-performance wear products designed to protect critical equipment in abrasive and high-impact environments. From ceramic liners and rubber sheeting to composite panels and CCO plates, our solutions extend service life and reduce downtime. Each product is engineered to suit site conditions and application demands.

VIC CONVEYORS
& CRUSHING

Screen Media Solutions Engineered for Performance

Vic Conveyors & Crushing (VCC) provides end-to-end screen media solutions designed to optimise performance, extend wear life, and reduce downtime across screening operations. Our capabilities include reverse engineering, in-house manufacturing, tooling, and pre-engineered polymer and compound processing, ensuring full control from design through to delivery.

We conduct site inspections to assess wear patterns, operational inefficiencies, and material flow. This allows our team to collect critical data and deliver tailored solutions that align with both site-specific requirements and broader plant objectives.

VCC specialises in application engineering, process improvement, and innovative design, with a focus on maximising production efficiency, reducing unplanned downtime, and supporting continuous operational improvement.

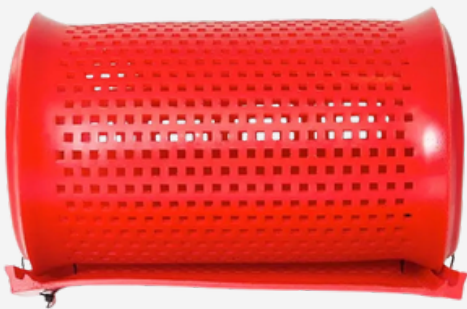

VIC CONVEYORS
& CRUSHING

Screening Panels

Vic Conveyors & Crushing (VCC) engineers and manufactures a wide range of polyurethane, rubber, stainless steel, and composite screen panels, including cross-tension screens and fine mesh panels for dry, wet, and dewatering applications.

From scalping coarse aggregates to fine precision screening, our panels are built for consistent performance, long wear life, and reliable fitment. We supply replacements compatible with major screening systems including Metso, Schenck, Multotec, Derrick, Rotex, CDE, TEREX Cedarapids, and others. Each panel is tailored to suit your plant, site conditions, and screening requirements.

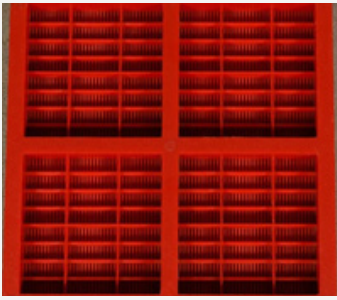

Modular Screen Panels

- Rubber Modular Panels – Full range to suit all machines, apertures, and sizes
- Polyurethane Modular Panels – Full range to suit all machines, apertures, and sizes
- Stainless Steel Modular Panels – Full range to suit all machines, apertures, and sizes
- Wedge Wire Modular Panels
- PIPO Poly Modular Panels – All aperture and size options

Specialised Screens

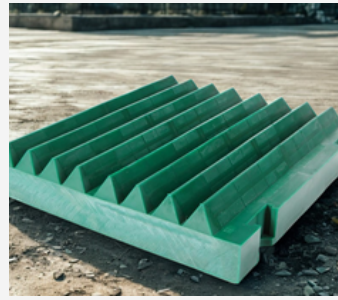

- Derrick Fine Screens – From 45 micron apertures, suits all deck configurations
- Rotex Screens – Complete panel range for all machines and aperture requirements
- Flip Flow Screens – Bivitec and Spaleck decks, including blanks, inline/staggered apertures, and clamp-down types
- CDE Panels – For screens and trommels in all aperture and size configurations
- Dewatering Screen Panels – Designed for all machine types and sizes
- Step Flow Rubber Panels (Trellstep) – Full range of apertures and sizes

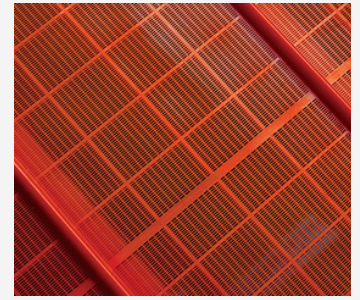

STEP FLOW POLY PANEL

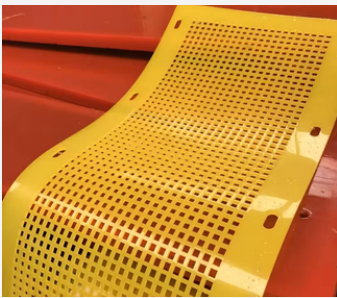

CDE SCREEN PANEL WS85

POLY RIPPLE SCREENS

Screening Accessories

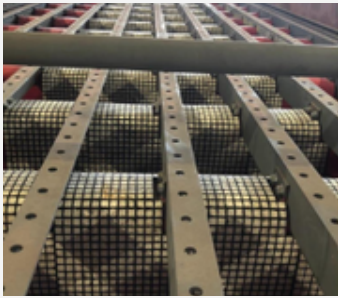

Vic Conveyors & Crushing (VCC) supplies a comprehensive range of screening accessories designed to support the performance, safety, and longevity of your screening equipment.

Our accessories are compatible with all major screen systems and are manufactured for durability, ease of installation, and reliable operation under harsh site conditions. Whether you're maintaining existing infrastructure or upgrading components, we provide quality solutions to keep your screening plant running efficiently.

Screening Accessories

- Side liners and wedges
- Rubber capping
- Polyurethane capping
- Poly skirting
- Rubber skirting
- Rubber socks and bellows
- Spray nozzles
- Clamp bars – plain and poly-coated
- Springs
- Hold-down bars
- Decloggers
